How to Install Java Runtime Environment Version 5

Using Microsoft Internet Explorer
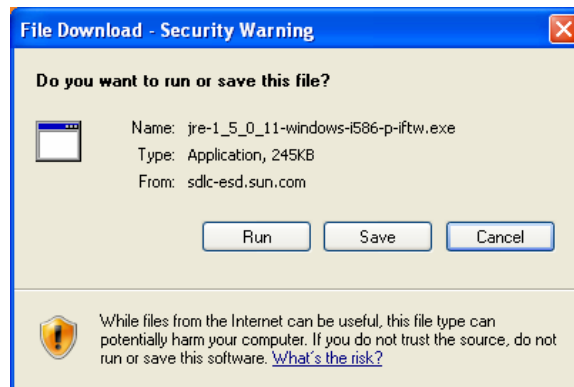

(For Mozilla Firefox, see page 3.)

1. Open Internet Explorer

2. Go to the following address

    www.java.com/en/download/manual.jsp

    The following page displays. Click the **Download** button that is labeled **Windows (Online Installation)**.

3. When the following window displays, click the **Run** button.

Note: Depending on your environment, you may receive security messages such as, "Downloads have been blocked," or, "You must load an ActiveX control." Such messages often appear in a *yellow bar* above the web page viewing area. You should allow any downloads or installs that are requested. If you are unable to do this, contact your system administrator.

4. When the following window displays, click the **Run** button.

5. If a "You already have…" message displays (below) then click the **OK** button.

When the Installation Completed window displays, click the Finish button. Then close Internet Explorer. You do NOT have to perform any further steps. You already have JAVA Run Time Environment (JRE) installed.

6. If the message in step 5 does NOT display, then the download and installation process will begin.

When the **License Agreement** window displays, choose the **Typical setup** option and click the **Accept>** button.

The Google Toolbar is NOT required. Clear the checkbox that installs this option if you do not want it.

When the **Installation Completed** message (above) displays, click the **Finish** button. Then close Internet Explorer.

How to Install Java Runtime Environment Version 5
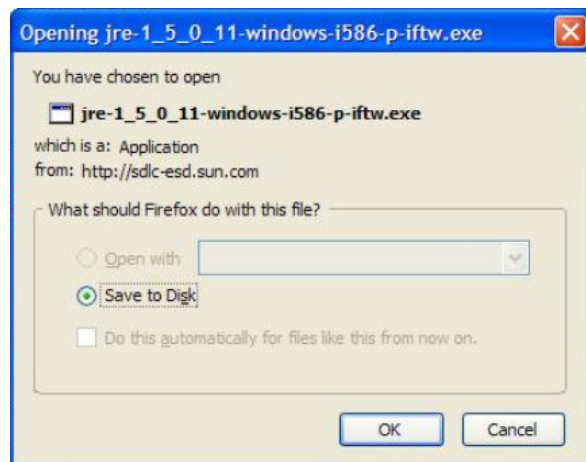

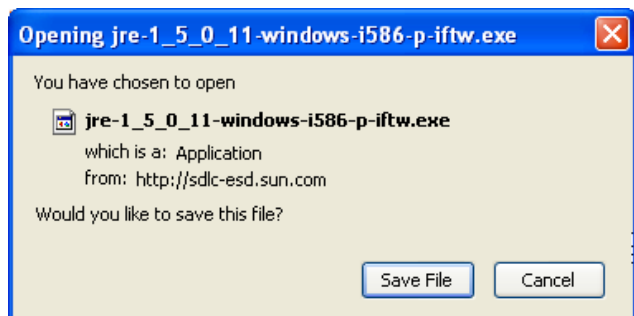

Using Mozilla Firefox

1. Open Mozilla Firefox.

2. Go to the following address

   www.java.com/en/download/manual.jsp

   The following page displays. Click the **Download** button that is labeled **Windows (Online Installation)**.

3. When one of the following messages displays, click the **Save File** button or the **OK** button, depending on the message.

   This will cause the installation file to be saved. Firefox will either save the file to your desktop, or ask you to choose a location. If you are given the choice, choose the desktop. The file name begins with **jre-1_5_0_...** and ends with …**exe**.
   If a **Downloads** window displays during the download and does not close automatically when it is complete, close it.
